Precast concrete products - Retaining wall elements

For use as elements in a modular gravity walling system

Concrete:

Compressive strength

$f_{ck} = 40 \text{ N/mm}^2$

For geometrical data, detailing and durability see Technical Documentation.

Technical Documentation: <http://www.cpm-group.com/products/retaining-walls/>

Mechanical Resistance:

Dependent on Client design specification

Complete wall: Factors of safety assessed for overturning, sliding and bearing capacity

Internal Stability: Factors of safety for overturning, sliding

Material Factors of Safety:

For Concrete: 1.15
